Dear Lord Mayor

This email seeks your urgent action to have Council remove the latest obstacle placed in the path of people riding bicycles in the City Botanical Gardens.

As far as we are aware the temporary archways you will see in the image appearing below were placed along the central path that connects the Albert St gates to the top end of Garden Points Road.

This latest obstacle is viewed as very poor planning, with such a well-used cycling route being shut down without warning or the provision of a signed alternative, and with the usual main commuter route via the Bunya Walk beside the river also closed for the Botanic Gardens Riverwalk and River Hub projects.

Regards
